

## Is MetaMod free? What license is it under?

Saturday, 05 September 2009 10:41 - Last revised Saturday, 05 September 2009

---

MetaMod (the non-PRO version) is free software licensed under the [GPLv2 license](#) . The source code is available as part of the download package. You do not need to register on the site in order to download the software, and the software is not obfuscated in any way.

MetaMod PRO is commercial software, under a [proprietary license](#) . The source code however is available as part of the download package and the software is not obfuscated in any way.

In order to use MetaMod PRO you must also install MetaMod. If you do not wish to use a mixture of a commercial license and the GPLv2 license then please [contact us](#) to discuss an alternative license arrangement for MetaMod.
